Medical Home Performance Profile by Special Needs Status and Type of Insurance

Data Source: 2007 National Survey of Children's Health

Medical Home Profile at a Glance

Georgia, all children: 58.5%

CSHCN: 59.8%

Public Insurance: 47.4%

	Special Health Care Needs Status [†]				Type of Insurance ^{††}			
	Statewide		Nationwide		Statewide		Nationwide	
	CSHCN	Non-CSHCN	CSHCN	Non-CSHCN	Public	Private	Public	Private
Met All Medical Home Criteria	59.8%	58.1%	49.8%	59.4%	47.4%	69.7%	45.4%	66.5%
Accessibility								
Has a personal Doctor or Nurse	93.9%	89.6%	94.7%	91.6%	90.1%	94.8%	90.8%	95.4%
Family-Centered Care (% who report "usually" or "always")								
Doctor spends enough time	85.3%	77.7%	79.9%	79.2%	71.4%	88.4%	71.0%	86.1%
Doctor listens carefully	90.8%	89.6%	87.9%	89.7%	86.3%	93.9%	85.7%	92.8%
Doctor provides specific needed information	92.0%	86.7%	82.7%	85.4%	85.1%	91.7%	81.5%	88.6%
Doctor helps parent feel like partner in care	90.3%	88.6%	85.7%	88.1%	87.8%	92.2%	84.5%	90.8%
Comprehensive								
Has a problem getting referrals when needed	18.4%	N/A*	21.6%	15.2%	N/A*	12.4%	23.9%	13.0%
Has a usual source for both sick and well care	98.1%	91.7%	94.8%	92.6%	91.3%	96.8%	90.5%	96.3%
Coordinated (among children receiving 2 or more types of services)								
Received any help arranging or coordinating care	26.1%	17.9%	24.8%	19.4%	19.9%	20.4%	22.9%	19.9%
Reported getting all help needed arranging care for child	N/A*	32.0%	31.1%	35.9%	N/A*	N/A*	38.1%	33.7%
Very satisfied with communication between doctors, when needed	69.9%	77.1%	66.2%	77.0%	66.7%	79.2%	70.0%	74.1%
Very satisfied with communication between doctors and school, when needed	61.8%	78.3%	56.8%	67.8%	81.1%	58.1%	63.6%	63.0%
Culturally Effective (% who report "usually" or "always")								
Doctor is sensitive to family customs and values	92.5%	89.8%	88.7%	89.4%	88.9%	92.6%	83.7%	93.5%
Availability of interpreter, when needed	N/A*	N/A*	74.8%	62.8%	N/A*	N/A*	65.1%	62.7%

Citation format: Child and Adolescent Health Measurement Initiative. 2007 National Survey of Children's Health Medical Home State Profile. Data Resource Center for Child and Adolescent Health website. Retrieved [mm/dd/yy] from www.medicalhomedata.org.

[†]Special needs status is determined using a validated instrument for identification of children with special health care needs (CSHCN) as defined by the federal Maternal and Child Health Bureau. The CSHCN Screener asks whether a child currently experiences any health consequences and, if so, whether that specific health consequence is due to a medical, behavioral, or other type of health condition that has lasted or is expected to last 12 months or longer. Non-CSHCN are those children who have not been identified with an ongoing special health need.

^{††}Results are only presented for public and private insurance coverage. State-level uninsured rates are too low to yield reliable estimates.

* N/A Estimates based on sample sizes too small to meet standards for reliability or precision. The relative standard error is greater than or equal to 30% and/or the number of responses is less than 20.
